GRASP GURU

Certified Agile Project Management Course

(WS17) Professional Scrum Product Owner™ Training

Public Course

$2,500/pax

Course overview

In today's digital and fast-moving corporate environments, there is a paradigm shift in the way enterprises are running their businesses and shaping their workforce - by becoming more agile and customer-centric.

The first step to enterprise agility is to instill the mindset of "being agile". We are dedicated to provide training and support to shape mindsets and facilitate learning as professional scrum practitioners for the organisation to transform its ways of working.

Learning outcomes

- Understand the concept of "Agile" and fundamentals of the Scrum framework

- Practice real-world facilitation and management techniques to implement Scrum projects

- Adopt agile mindset and practice agile values and principles

- Generate a product backlog and learn techniques to prioritize and groom the backlog with the Scrum Team

- Optimise delivery of value and business outcomes through estimation techniques
